## Terminology

The title of this volume, "Pedophilia," is the word that the popular media give to any kind of sexual behavior between an adult and a legally underage person. However, the more scientific definition of the term "pedophilia" is "sexual attraction to prepubertal children." The term for actual sexual behavior between an adult and a prepubertal child is "pedosexual behavior." Sexual attraction to adolescents is called "ephebophilia" (the synonym is "hebeophilia"), and actual sexual behavior between an adult and an adolescent is called "ephebosexual behavior." All of these specific attractions and behaviors are discussed separately in this volume under the rubric "Pedophilia."
