

Peter SEARSON

saw me today and asked that he be transferred from his present parish at the major changes at the beginning of next year.

He believes that he has given good service in a big and demanding parish. His health is deteriorating - he had a benign growth removed from his larynx earlier this year and he has now been advised that he has diabetes.

He would welcome a smaller parish suitable to his age and capacities.

17th November, 1983.
