\$75,000 loss of choice - more opt abt. than secondary + tertiary education.

On going medicals - check if paying but needs to be clarified.

\$100,000 each general.

David: Figs are outside our range. They are the type of figs you'd put in parties.

DAVID:

Emma: I don't see how she will succeed.

Say on bal of prob¹⁰³ she was absent, it was in '88 + '89. ∴ has no case.

Katie: She should have a case but early to the extent that Solomon's complaints did have avoided full done after that time. That is really the tail end. Seems to me it is a spiky approach. ∴ the sort of \$ that she'll get for the cargo scheme.

Today's claims: Need to prove causation. Then need to prove diff in effect on them if Katie's done cargo work. And you will want the law.

But if the other claims resolve we'll pay (Wing medical)
