PARKVILLE. 3052.

Dear Doug,

Robert Cummings, aged 18, whom you referred to this Unit has been assessed by Mr. T. Verberne and myself. Though we are, at best, cautious about the results, Tom is prepared to give him a trial of behaviour therapy which will probably involve about 20 sessions. The patient is apparently keen to co-operate.

I have suggested to Tom that he make his appointments through Jean Holland.

Yours sincerely,

Graham Mellisop.
