Diagnosis(es)

MOBILE EPIDIDYMISS

HISTORY -  
Daryl James presented with a history of intermittent painful swelling of the left testis, made worse by standing and especially affected his posture as member of military band. *pos. 1/5*

PROFILE -  
Married, expectant father. Non-smoker, *social* smoker drinker, musician in regular army.

PAST MEDICAL HISTORY -  
Tonsillectomy  
Wisdom tooth extraction

MEDICATION -  
Nil.  
Allergies nil.

EXAMINATION -  
Chest clear.  
CVS - BP 125/80 Pulse 80 regular, afebrile.  
Abdomen - L<sup>o</sup> S<sup>o</sup> K<sup>o</sup> K<sup>o</sup> No masses, no tenderness.  
(L) testis was covered by slightly larger epididymis than (R).

INVESTIGATIONS -  
CBP - n.a.d.

PROCEDURE -  
Operative inspection revealed an enlarged mobile epididymis that could easily be tated. This was repaired such that further tortion could not occur.

PROGRESS -  
Uneventful recovery.

FOLLOW-UP -  
It is suggested that patient see Mr. Wilson in his rooms in 1 month.  
To present to M/O D.S.U. Friday for R.O.S.
