

KNOX GRAMMAR SCHOOL,
WAHROONGA,
N.S.W., 2076

12th September, 1977.

Dear Dr Paterson,

I have been approached by a G.P.S. School in New Zealand to take up appointment there at the beginning of 1978. As this position involves the teaching of Biology at a senior level, a Housemastership and the Coach of their First Fifteen, I feel that it will be a progressive step in my career to accept.

As you are aware from my many involvements I have sincerely enjoyed my stay at Knox. Whether being initially involved with Camp Knox, in the classroom, Cadets, or on the sporting fields (culminating with running Rugby last year), Knox has given me a great deal of satisfaction, and I hope in some small way I have contributed to the development of the boys and the School during this time.

Would you be kind enough to provide me with a reference covering my span of activities during the past four years, so that I may forward a copy to New Zealand.

I hope that I have not left you in 'the lurch', but this offer only became available when I was in Cadet Camp during the latter part of the holidays.

You, of course, will have my full support and involvement until the end of term, and I will formally resign as soon as receive the contract.

I wish you and the School all the best in the future,

Yours sincerely
