Dear Dr. Mills,

I have seen Terry Kirkpatrick and his parents again today.

They tell me you were able to arrange for him to see your psychologist about a month ago, but as yet we haven't the text of his report.

Terry has improved to some degree behaviourly and in his attitude to the family. His wheezing continues but as described sounds of allergic origin.

I will be most interested in the results of his projective testing when available.

Yours sincerely,

(Owen Spencer)  
Medical Officer.
