CIB

Call

I spoke with Dr Keiran Moran re medical report from Dr Cregan. Dr Moran believes there is no evidence to suggest that CIB had been assaulted on reading the medical report. In matters of casework, another incident was mentioned by CIB. The Mater Dei state that this resident due to his intellectually and physical disabilities would be most unlikely. He is now not in the same cottage as CIB. There was some rumours that a house father could have been the alleged perpetrator. Again there was no evidence to support this theory and his services have been terminated for other reasons and no longer works at Mater Dei.

CIB has settled down and appears quite happy. Her mother and Mater Dei undertake to advise if there are any further concerns. C.M [illegible] are taking no further action.
