

C.A.R. CIB

REDACTED

5/7/91

A visit was made to CIB 's work place so as to get her written permission for the release of the report on the examination of her daughter CIB . CIB stated CIB was tested at Dr. Sugerma's Illawong on the 16th June, 1991 for Aids, Hepatitis B and full blood count, urine test. As well as Dr. Gilroy took a swab for a Vaginal but all tests came back negative, further test will have to be done in 3 months time.

CIB also said CIB "is a lot better starting to get all her energy back, she is happy now at school and at home".

CIB felt that "Now that CID is gone, there is a marked difference in the behaviour of the children at the cottage and even people at the cottage seemed happy". (CIB is at home now on school holidays).

According to CIB a person in charge of the cottage had said that it was going to be a big change at the cottage as they were going to put even numbers of girls and boys in the cottage.

She also said that one member of the staff at Mater Dei told her kinky gear in CID 's room was found by staff when CID went to England to his father's funeral. Apparently they (staff at Mater Dei) knew they suspected CID then and this happened approximately 2 months before CIB 's incident.

CIB said "As far as I am concerned the school knew about CID".
