

2. Both [REDACTED] and [REDACTED] had complained about the behaviour of [ARH] to us for some time at the school. They both described that they witnessed Mr [ARH] 'tickling and cuddling' younger children and that they had themselves been touched by [ARH] in a manner which they felt inappropriate in their time at the school. They also said that [ARH] had been photographing younger children at the water polo and they felt that was also inappropriate. Prior to the [REDACTED] incident, [REDACTED] decided that she should contact the school and discuss the matter. We were also concerned that other children were feeling equally uncomfortable with this behaviour. Although somewhat apprehensive to approach the school, [REDACTED] spoke directly to Mr [REDACTED] and Mr [REDACTED] about the behaviour. Mr [REDACTED] said in that conversation that he had heard similar comments from other parents about [ARH]. He said that the school would look into the matter. We heard nothing further.
