Re: AW

Pt's opening line was "this actually has nothing to do with you," but he had a matter he wished to discuss & he wasn't sure what to do.

Pt. then outlined that when Dr. Rolleston was at the Practice and when the pt was around 14 years of age, he had seen Dr. Rolleston at this Practice & on a couple of occasions at RNSH & Dr Rolleston had masturbated him to ejaculation on the pretext testing for infection. The pt. has never told anyone of these happenings until recently. Feels that the Dr should not be in a position where he can continue to have access to trusting youngsters possibly be able to abuse them. Unsure what to do, hasn't "thought it all through" but wanted to discuss it with me. Wants to have further interview with Dr. Pollitt & myself. Driven merely by desire to protect further victims. Says it hasn't caused detriment to his life in terms of being able to succeed but does trouble him from at times.

[Signed Dr Roger Stone]
