Dear Peter

I hope things are going well. I think that you are still following The Hermitage Course which I hear good things about.

Gerry Burns, Andrew Moraghan, myself, together with our legal representatives met with DK and his wife to discuss the complaints he had made regarding his time at SAC. It was a rather unusual format, in fact the first time I have had two former teachers in the discussion and was facilitated by Michael Salmon who is the Director of the PSO in Sydney.

It was a very moving discussion ranging over the story of the life of DK and his present situation. His concerns about people being aware of abuse at the time and not protecting children, were well and truly reviewed. After some time we came to a settlement regarding the issues. Overall I think it could be described as a worthwhile exercise and there was some reconciliation with the two former staff members there. By the time we had finished the discussion there was no indication from DK that he wanted to have a meeting with yourself. He was in the process of moving from REDACTED to REDACTED where his wife who is a REDACTED was taking on a new job. DK himself was going to become the house parent for their new baby. All in all I think it was a good outcome and the financial matters were covered by CCI. There were the usual discussions regarding responsibility and prior knowledge but at this stage it does seem that it is the end of it as far as DK is concerned and that there was some real healing. He accepted an invitation from AM to visit Mittagong sometime.

I'm hoping that the matter will fully settle now and DK and wife can get on with the next stage of their life and you will not be bothered. Once again Peter stay well and enjoy your time there.

As you have noticed we have lost a few men lately and Ged Williams is not looking good at all at the moment. Another man who has just had bad news is John Moran who has been told that he has bone cancer extensively and not a lot of hope for any positive treatment.

All the best for now.

Alexis=
