Got scared he would hurt me

Did he?

Different scenario, he was bullying me to assert my homosexuality.

How did he do that?

He said he was friends with me and wanted a sexual relationship with me.

I do not at all.

I am not homosexual.

When did he say this? – biking to St Georges Basin.

I turned to go home, he followed me

Dad saw him defend himself for coming home early (They came back early because CIE turned and came back)

Zero going to Disability Trust when he was there.

Dad was friendly even when he said I was to have a relationship with him.

He has decided to get you to allow to have great time sexually finding feeling good.

Cranky he tried it on me.

Just get him gone

Tuesday night 20.3.2012 / Did not like the look <sup>CIE</sup> gave him when he turned up. <sup>CIE</sup> was not pleased

- New worker, Royce.

Arrange for them to go to St Georges Basin on bikes.

They came home early. 4.30pm

I said about it being early.

Royce said that at a cross street <sup>CIE</sup> just turned around and came back. I asked him what did he do – he said he followed him.

After this visit <sup>CIE</sup> displayed distress signals. I got the QWERTY point speller and asked him if he liked the bike ride. He pointspelt twice. You come with me next time.

I asked him why, he pointspelt "The man has form from many times before".

I asked him what that meant. He displayed extremely upset behavior.

I calmed him down and told him to say specifically what was wrong.

He told me Royce touched his willy in the toilets. I asked how long has this been going on – he said pointspelt "many times". I asked him why he had not told us. He said "I felt it was my fault because I was aroused"

The police are going to want to know dates, times when it occurred. Do you remember when it first started.

Last year in the centre in holiday care. Every time he found time to do it. Go to centre for lunch and morning team.

(He said) <sup>CIE</sup> said he wants toilet. Have a clear memory of what he said.

Then what happened?

Very upset he said that. Sandra gave approval by saying "Just take him in, go with him".

Centre based activity that day.

He said "Here <sup>CIE</sup> get a load of this."

Then he tried to have some fun by feeling me for a while. Dreadful decision, he felt my penis.

What did you do?

Not know what to do.

Did he say the word "said" in he wants toilet?

Yes.
