

1989 THIRD WORLD ALMANAC

1989 THIRD WORLD ALMANAC

almanac = al + ma + nac n.
 a yearly calendar giving statistical
 information on events and pheno-
 mena ...
 Also (archaic): almanack.
 (C.14: from Medieval
 Latin almanachus, perhaps from
 late Greek almenikhiaka)

A picture is worth a thousand words. If every good visual image collected in this Almanac told as much, then it would be destined for the library shelves. As it is, with 52 pictures – one for every week of the year – this publication is designed for bag, pocket or even, in a novel stand-up fashion for the desk top. In a unique Anglo-Swiss venture, we have brought together some of the finest work of top international photographers. They give us their visual comments, through the lens, on social justice and the Third World. Whilst the diary is to be used throughout the year, the images will linger far longer.

As an almanac, this publication lists some of the most significant global statistics of the year and provides a rich source of quotations by social commentators through the ages. Above all, the almanac is immensely practical; laced with good ideas for your personal organisation over the next twelve months. Look inside to find out.

Chinks of light

- Action Directory: a guide to some of the campaigning organizations in Aotearoa (NZ), Australia, the UK, Canada and the US.

AT THE END:

- Telephone numbers
- Addresses/notes

QUOTATIONS

We have aimed to present pertinent quotations from significant people. However only over the last ten years has there emerged a growing awareness of the sexism inherent in language. Some quotes predate this consciousness and use 'man' or 'men' instead of 'people' or 'humanity'.

When it comes to healing people account has to be taken of those long neglected complementary methods of medicine.
