

Mr Wilson,

I am EO [redacted] and I was in your care in the Gill Home at Goulburn, at this point I would like to emphasize 'care'.

Let me remind you of what care is meant to be, and not what you think it to be in that sick brain of yours.

Care means: guidance, cultivation of interests, respect (be it mutual or otherwise), concern, take interest in, provide for, and finally the **BIG look after**. Now let me explain just what you did in my presence and in front of other boys. Firstly, your preference for caring on cold mornings was extreme and barbaric and in the least sadistic, we would watch your face as you caned us and thinking about it now, **YOU WERE OUT OF CONTROL**.

Next was the beating we copped on a school morning, it was not just one of us this time, you took your rage out on all of us. You caned without mercy that morning and it did not matter where you struck us but you did get us all over the body.

I know I am stirring memories in you now, I could go on all day in pages and pages, but read my letter to the Salvation Army, and if you can deny it then it only proves to me, that you as a man, are spineless with no intestinal fortitude, and therefore cannot be called a man of any faith or redeeming values. Remember Mr Wilson, that people with good morals and values are the ones that are left to pick up the pieces of the young lives you shattered, lives of the innocent that you shattered with your cruel sadistic and inhumane treatment and torture, while wearing the uniform of the Salvation Army.

Very many years have passed now and after an extreme amount of soul searching and counselling, I know now that it was not the Salvos, it was you, you disgrace not only yourself, but the uniform and all it stands for. I now can sit and say without any form of pretence, that you are a coward and sadistic man, and I can only pity you when you are judged. Don't worry, it used to be hate, but I have no time to hate anymore, because I will not lower myself to that level again.

There are many people helping me now and I will survive, unlike all the dinosaurs like you.

Thankyou.
