**Details of alleged misconduct**

In addition to my original complaint I would like it known that my life has been very difficult possibility as a result of the events that took place in the boys home. I have been severely dependent on alcohol; I have experienced the breakdown of my marriage; I have been deprived from seeing my children; and I have an obsession with cleaning. This last issue probably stems from the punishment inflicted on me and the other boys in the home when cleaning wasn't done to their satisfaction. We had to clean the pots and pans, the floors and the toilets. One day I got really sick after cleaning the toilets and some stuff went in my mouth. Only hours latter I was in the hospital having my appendix out.

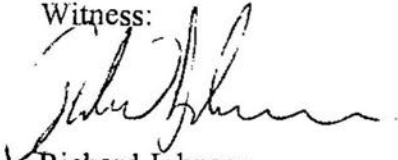

I really would like to know why little kids were treated as slaves. It wasn't necessary. I also need to know what happened to  He seemed to just disappear. I need to know to put my mind at rest.
