Dear Andrew,

We are aware that the relevant authorities have been informed of the incident at Corp camp in April this year. We are aware that authorities may wish to speak with CLC

CLC was asleep at the time of the alleged incident. He is traumatised by the harassment and bullying he has been subject to since April. He does not wish to make any statement to the police and does not want to give any statement in proceedings. His mother and I support this stance. Nor does he wish to make any further statement to school other than on a privileged basis for the purposes of the school. Any statement made by him to date is on a confidential basis.

We do wish the school to deal with the harassment and bullying he has received in relation to the incident.

We insist that CLC be in the presence of his parents or our nominated legal representative if he is questioned by authorities.

Regards,

EAE
