Subject: RE: Government Department of Child Safety

Dear Royal Commission Team

[REDACTED]. I have had a private session [REDACTED], this did not give me any answers or encouragement. I want to know why there has been no, that is none at all to my knowledge of any individuals made take responsibility for the deaths, physical abuse, sexual abuse or deliberate neglect by case workers. WHY!! Are they not an institution, it is obvious they are a protected department and have been forever.

I did see were the Royal Commission talked to the department on what their new steps would be. To believe this you must be naive to believe people that know nothing about what has happened [REDACTED] and in the Communities. 10 Years I have been fighting for justice and for the truth to be told and for someone to listen but I am classed as an idiot, uneducated and extreme by all that I come up against.

If the Royal Commission was only to be about historical sexual abuse, why were we not told from the start, I believed you were going to hold all accountable for past and present abuse. Child Safety or Child Welfare were and still are the department that place these children in all these institutions. They must be held accountable.

I would like an answer explaining your reasoning please.

[REDACTED]
